**Doubly landlocked country:**
A landlocked country surrounded only by other landlocked countries may be called a "doubly landlocked" country. A person in such a country has to cross at least two borders to reach a coastline.

- Liechtenstein in Central Europe surrounded by Switzerland and Austria.
- Uzbekistan in Central Asia surrounded by Afghanistan, Kazakhstan, Kyrgyzstan, Tajikistan, and Turkmenistan.

There were no doubly landlocked countries in the world from the Unification of Germany in 1871 until the end of World War I. This is because Uzbekistan was part of the Russian Empire, and thus part of a country that was not landlocked; while Liechtenstein bordered Austria-Hungary, a country which had an Adriatic coast until it was dissolved in 1918. Upon the dissolution of Austria-Hungary Liechtenstein became a doubly landlocked country. There were again no doubly landlocked countries from 1938 until the end of World War II, as Nazi Germany had incorporated Austria, which meant that Liechtenstein bordered a country with a coast. After World War II Austria regained its independence and Liechtenstein became doubly landlocked once more. Upon the dissolution of the Soviet Union, Uzbekistan became the second doubly landlocked country.

**Landlocked by a single country:**
There are only three countries that are landlocked by a single country – that is they are surrounded on all sides by just one country. Such a country is also called an enclave.
Lesotho, an enclave in South Africa.
San Marino, an enclave in Italy.
Vatican City, an enclave in the city of Rome, Italy.

736: Landlocked by two countries There are seven landlocked countries that are surrounded by only two mutually-bordering neighbors:

891: Hum Honge Kaamyab / Ek Din" : In India, renowned poet Girija Kumar Mathur composed its literal translation in Hindi "Hum Honge Kaamyab / Ek Din" which became a popular patriotic/spiritual song during the 1980s, particularly in schools.

892: Bhishma’s Conch: Shashanka the name of Bhishma's conch

893: Dowry of Bombay: Negotiations for the marriage began during the reign of King Charles I(with Catherine Braganza), were renewed immediately after the Restoration, and on 23 June 1661,
in spite of Spanish opposition, the marriage contract was signed, England securing Tangier (Morocco in North Africa) and the Seven islands of Bombay (in India), with trading privileges in Brazil and the East Indies, religious and commercial freedom in Portugal and two million Portuguese crowns (about £300,000); while Portugal obtained military and naval support against Spain and liberty of worship for Catherine.

894: Arjuna killed Karna using the Anjalika weapon to decapitate him.

895: Arjuna used his most powerful weapon, Pashupatastra to slaughter Jayadratha

896: Silk Route: The German terms "Seidenstraße" and "Seidenstraßen" - 'the Silk Road(s)' or 'Silk Route(s)' were coined by Ferdinand von Richthofen, who made seven expeditions to China from 1868 to 1872.

897: Cassini–Huygens is a Flagship-class NASA-ESA-ASI robotic spacecraft sent to the Saturn system. It has studied the planet and its many natural satellites since arriving there in 2004, also observing Jupiter, the heliosphere, and testing the theory of relativity. Launched in 1997. It launched on October 15, 1997 on a Titan IVB/Centaur and entered into orbit around Saturn on July 1, 2004, after an interplanetary voyage which included flybys of Earth, Venus, and Jupiter. On December 25, 2004, it reached Saturn's moon Titan on January 14, 2005, when it entered Titan's atmosphere and descended to the surface. This was the first landing ever accomplished in the outer Solar System.

898: The three wise men who visited Jesus: Traditions identify a variety of different names for the Magi. In the Western Christian church they have been commonly known as: Melchior a Persian scholar; Caspar an Indian scholar; Balthazar an Arabian scholar

899: Tendulkar 50000 runs: Needing 26 runs on the day to achieve the feat, Tendulkar tucked one towards mid-wicket for a single off left-arm spinner Yannick Ottley (Trinidad and Tobago), in the Champions League T20 match between Mumbai Indians and Trinidad and Tobago.

900: Polyandry examples: However, when questioned by Kunti to give an example of polyandry, Yudhisthira cites Gautam-clan Jatila (married to seven Saptarishis) and Hiranyaksha's sister Pracheti (married to ten brothers).

901: The Pamir Mountains (Mount Meru): are a mountain range in Central Asia formed by the junction of the Himalayas with Tian Shan, Karakoram, Kunlun, and Hindu Kush ranges. They are among the world's highest mountains, and since Victorian times, they have been known as the ’Roof of the World’, presumably a translation from Persian.

"Onion Range" (after the wild onions growing in the region. They lie mostly in Gorno-Badakhshan province, Tajikistan and Badakhshan Province, Afghanistan.

902: The Ganges begins at the confluence of the Bhagirathi and Alaknanda rivers. The headwaters of the Alakananda are formed by snowmelt from such peaks as Nanda Debi, Trisul, and Kamet. The Bhagirathi rises at the foot of Gangotri Glacier, at Gaumukh, at an elevation of 3,892 m (12,769 ft). Although many small streams comprise the headwaters of the Ganges, the six longest and their five confluences are considered sacred.

The six headstreams are the Alakananda, Dhauliganga, Nandakini, Pindar, Mandakini, and Bhagirathi rivers. The five confluences, known as the Panch Prayag, are all along the Alaknanda. They are, in downstream order, Vishnuprayag, where the Dhauliganga joins the Alakananda; Nandprayag, where the Nandakini joins; Karnaprayag, where the Pindar joins, Rudraprayag, where the Mandakini joins; and finally, Devprayag, where the Bhagirathi joins the Alaknanda to form the Ganges River proper.

903: "Dulcinea del Toboso" (real name Aldonza Lorenzo) is a fictional character who is referred to (but does not appear) in Miguel de Cervantes' novel Don Quixote. Seeking the traditions of the knights-errant of old, Don Quixote finds a true love whom he calls Dulcinea.
904: **Sacrifice of Bulls:** Neptune is one of the only three Roman gods to whom it was appropriate to sacrifice bulls, the other two being Apollo and Mars.

905: **Pedestrian Crossing:** In the United Kingdom and parts of the Commonwealth of Nations, animal names are often used to distinguish several types of such crossings:

- **Zebra crossing:** wide longitudinal stripes on road, often with belisha beacons; pedestrians may cross at any time; drivers must give way to pedestrians who demonstrate intent to cross.
- **Pelican crossing:** traffic lights for pedestrians and vehicles; button-operated.
- **Puffin crossing:** pedestrian lights on near side of road; button-operated with curb-side detector.
- **Toucan crossing:** for bicycles as well as pedestrians.
- **Pegasus crossing:** an equestrian crossing.

Belisha beacons are found at zebra crossings. The other types of crossing use coloured pictogram lights, depending on the intended users of the crossing this will be a man, a bicycle or a horse.

906: **Curiosity.** In keeping with a 40-year tradition, a plaque with the signatures of President Barack Obama and Vice President Joe Biden was also installed. Elsewhere on the rover is the autograph of Clara Ma, the 12-year-old girl from Kansas who gave Curiosity its name in an essay contest, writing in part that "curiosity is the passion that drives us through our everyday lives. On August 6, 2013, Curiosity audibly played the "Happy Birthday" song in honor of the one Earth year mark of its Martian landing. This was the first time that a song was played on a foreign planet; making "Happy Birthday" the first song and Curiosity the first device used to play music on a foreign planet. This was also the first time music was transmitted between two planets.

907: **K2 first ascent:** An Italian expedition finally succeeded in ascending to the summit of K2 via the Abruzzi Spur on 31 July 1954. The expedition was led by Ardito Desio, and the two climbers who reached the summit were Lino Lacedelli and Achille Compagnoni. The team included a Pakistani Colonel Muhammad Ata-ullah, who had been a part of the 1953 American expedition.

908. **Rihla or "The Journey :** After returning home from his travels in 1354, and at the instigation of the Marinid ruler of Morocco, Abu Inan Faris, Ibn Battuta dictated an account of his journeys to Ibn Juzayy, a scholar whom he had previously met in Granada. The account is the only source for Ibn Battuta's adventures. However, it is often simply referred to as the Rihla or "The Journey.

909: **Mandip Singh Soin :** His mountaineering ascents include the first Indian ascent of Mount Meru in 1986 in the Himalayas as well as several ascents in the French and Swiss Alps, Italian Dolomites, Wales and Scotland. He also led the first crossing on camel back of the Indian Thar desert from Jaisalmer to the Rann of Kutch in 1986, and the first Elephant expedition in the jungles of Kerala in 1990.

910: **The Galapagos Penguin** (Spheniscus mendiculus) is a penguin endemic to the Galapagos Islands. It is the only penguin that lives north of the equator in the wild. It can survive due to the cool temperatures resulting from the Humboldt Current and cool waters from great depths brought up by the Cromwell Current.

911: **The largest living species is the Emperor Penguin** (Aptenodytes forsteri): on average adults are about 1.1 m (3 ft 7 in) tall and weigh 35 kg (75 lb) or more. The smallest penguin species is the Little Blue Penguin (Eudyptula minor), also known as the Fairy Penguin, which stands around 40 cm tall (16 in) and weighs 1 kg (2.2 lb).

912: **Niladri Vijay :** In the coastal city of Puri in Odisha, main deity the rasgulla has been the traditional offering to the Hindu goddess, Lakshmi, the consort of the Puri temple’s, Jagannath. In fact, it is an age-old custom inside the temple to offer rasgullas to Lakshmi in order to appease her wrath for being ignored, on the last day of the nine day long Rath Yatra (chariot festival). Only after the goddess has savored rasgullas, do the trinity of deities re-enter the temple precincts after their sojourn. Niladri Vijay, has traditionally marked the concluding of the festival every year.

913: **Adi Shankar’s Parents:** Shivaguru and Ayamba lived in the village of Kaladi, in Kerala,
914: **Operation Saiyam**: Lt. Col. Vinod Bhat, commanding officer of the 202 Bomb Disposal Unit (BDU), told IANS about Operation Saiyam. The operation, which began in Ludhiana district Nov 10, involves the disposal of around 17,000 pieces of scrap ammunition of unknown origin which were imported by Punjab-based steel companies in 2004.

915: **Guerilla warfare**: Shivaji established a competent and progressive civil rule with the help of a disciplined military and well-structured administrative organisations. He innovated military tactics, pioneering the guerilla warfare methods (*Shiva sutra* or *ganimi kava*), which leveraged strategic factors like geography, speed, and surprise and focused pinpoint attacks to defeat his larger and more powerful enemies.

916: **Battle of Sharagarhi**: Gurmukh Singh, who communicated the battle with Col. Haughton, was the last Sikh defender. He is stated to have killed 20 Afghans, the Pashtuns having to set fire to the post to kill him. As he was dying he was said to have yelled repeatedly the Sikh battle-cry "Bole So Nihal, Sat Sri Akal" (Shout Aloud in Ecstasy! True is the Great Timeless One). "Akal," meaning Immortal, beyond death, the Supreme Creator God unbound by time and non-temporal.

917: **Bantony Estate**: located in the heart of the town, was the summer palace of the erstwhile Maharaja of Sirmaur. The architect is said to be T.E.G. Cooper. Before its construction in 1880, the place had a rickety cottage belonging to Capt A. Gordon and housing some army officers.

918. **There are three golf balls** on the Moon (left by Apollo 14 astronaut Alan Shepard in 1971.)

919. **Three moons have yet been found** to have their own moons: Saturn’s moon Titan, Jupiter’s Lo, and Neptune’s Triton.

920. **Voter Verifiable Paper Audit Trail system (VVPAT)** The Government of Indian, via notification, dated 14 August 2013, has amended the Conduct of Elections Rules, 1961, enabling the Election Commission of India to use Voter Verifiable Paper Audit Trail system (VVPAT) with the Electronic Voting Machines. The Election Commission of India has decided to use the VVPAT system at the By-election for 51 Noksen Assembly Constituency of Nagaland.

921. **Wally A. Schirra** was the only astronaut one of the Mercury 7 astronauts to fly in all three of NASA’s 'Moon Shot' programs (Mercury, Gemini and Apollo)? Wally A. Schirra was the only man to fly in all three projects. Alan Shepard flew in Mercury and Apollo, but not in Gemini. Gus Grissom was involved in all three project, flying in Mercury and Gemini, but he was killed during a pre-flight simulation in his Apollo 1 capsule, so he never actually flew in the Apollo program.

922: **The Bombardment of Madras** was an engagement of World War I, at Madras (Chennai), British India. Captain Karl von Müller in command, on the night of 22 September 1914, SMS *Emden* quietly approached the city of Madras on the southeastern coast of the Indian peninsula. After entering the Madras harbor area and observing for a moment, Müller gave the order to engage at 9:30 pm, Emden opened fire at 3000 yards on the several large oil tanks within the harbor which belonged to the Burmah Oil Company.

923: **President Richard Nixon** had speechwriter William Safire prepare a condolence speech for delivery in the event that Armstrong and Aldrin became marooned on the Moon's surface and could not be rescued.

924: **Pakistan’s Space Programme**: Finally, in 1988, India exploded its second nuclear test (see: Pokhran-II) which invited Pakistan to follow the latter's step and performed its own atomic tests (Chagai-I and Chagai-II). Pakistan pursued its research and development in space and astrophysics in 1961 after giving commission to its space program led by Space Research Commission (SUPARCO). Its unmanned flight test program achieved a great feat after launching its first rocket in orbit, Rehbar-I. Finally in 1990, Pakistan followed India's suit, and put its own and first artificial
satellite, Badr-1, in Earth orbit. With the technical assistance from China, Pakistan launched its first geostationary satellite, Paksat-1R in 2011.

925: Pluto:-
The dwarf planet Pluto is named for the ancient Roman god of the underworld. In Roman mythology, Pluto was the son of Saturn who, with his three brothers, controlled the world: Jupiter controlled the sky, Neptune controlled the sea, and Pluto ruled the underworld.

Pluto takes the longest time of the eight planets (248 Earth years) to orbit around the sun. Because it’s the nearest to the sun, Mercury has the fastest orbit, at 88 Earth days. Earth takes 365 days to orbit the sun.

Pluto is the only known dwarf planet with an atmosphere.
It takes Pluto 6 days, 9 hours, and 17 minutes to spin once, making it the planet with the second-slowest rotation in the solar system. Venus has the slowest rotation, taking 243 days to spin just once. Jupiter is the fastest-spinning planet, rotating on average once in just less than 10 hours.

Pluto spins in the opposite direction as Earth, which means the sun rises in the west and sets in the east. Only Venus, Uranus, and Pluto have a retrograde rotation.

In astrology, Pluto is associated with powers of creation/rebirth as well as destruction/death.

.. The sky is so dark on Pluto that a person would be able to see stars during the day.

Pluto has four known moons: Charon (ferryman of Hades), Nix (the Greek goddess of night and darkness), Hydra (the nine-headed serpent who guards Hades) and S/2011 P 1, which was discovered in 2011.

Pluto is the second-largest dwarf planet in the solar system. ERIS which is 27% larger than Pluto, is the first. Officially, Pluto’s name is now asteroid number 134340 after being downgraded from a planet to a dwarf planet. (Dwarf planets are one type of astronomical object catalogued as an asteroid.)

On Pluto, the sun rises and sets about once a week.

926: Alcohol in Universe: Sagittarius B is a vast molecular cloud of gas and dust floating near the centre of the Milky Way, 26,000 light-years from Earth, 463,000,000,000 kilometres in diameter and, amazingly, it contains 10-billion-bilion-litres of alcohol. The vinyl alcohol in the cloud is far from the most flavoursome tipple in the universe.

927: There’s a planet-sized diamond in Centaurus named after a Beatles song.
Astronomers have discovered the largest known diamond in our galaxy, it’s a massive lump of crystallised diamond called BPM 37093, otherwise known as Lucy after The Beatles’ song Lucy in the Sky with Diamonds. Found 50 light-years away in the constellation of Centaurus, Lucy is about 25,000 miles across, so much larger then planet Earth, and weighs in at a massive 10 billion-trillion-trillion carats.

928: The Peterhoff is a building in Shimla which has housed at least seven Viceroy’s and Governors General of India during the British Raj. Its first occupant was James Bruce, 8th Earl of Elgin, who moved into the building in 1863.

After India’s independence from the British Empire, the building served as the Punjab High Court. It was at Peterhoff where the trial of Nathuram Godse, who assassinated Mahatma Gandhi, took place in 1948-49. In 1971, when Himachal Pradesh became a full-fledged state, Peterhoff served as the Raj Bhavan (the Governor’s residence).

930: Foundation stone of Parliament house was laid on 12 Feb. 1921 by Prince Arthur, Duke of Connaught, third son of Queen Victoria.

931: Trihayani: Since she has taken birth in three yugas (ages; a cycle of four ages is believed to repeat) – Vedavati in Satya yuga, Maya Sita in Treta Yuga and Draupadi in Dwapara yuga, she is known as Trihayani, the one who appears in the three ages.

932: The Voyager 1 spacecraft is the most distant human-made object from Earth. Voyager 1 captured the most distant photograph of Earth.
In 1990, as part of the spacecraft’s ongoing mission, Voyager 1 turned its camera back on our home planet and took a picture. This became known as The Pale Blue Dot. Seen from 6 billion kilometres away, the Earth appears as a tiny blue speck in the depths of space. Astronomer Carl Sagan, who first suggested the idea of the photograph, noted, “From this distant vantage point, the Earth might not seem of any particular interest. But for us, it’s different. Consider again that dot. That’s here. That’s home. That’s us.

933: Goldilocks Planets: Scientists searching for extraterrestrial life focus on “Goldilocks Planets” – these are planets which fall into a star’s habitable zone. Planet Earth seems to have exactly the right conditions for life to exist – its distance from the Sun means the temperature is right, water can exist as a liquid solid and a gas, and there are the right combination of chemical compounds available to build complex life forms. Other planets thought to have similar features are known as Goldilocks planets.

934: Robert Falcon Scott, CVO (6 June 1868 – c. 29 March 1912) was a Royal Navy officer and explorer who led two expeditions to the Antarctic regions: the Discovery Expedition, 1901–04, and the ill-fated Terra Nova Expedition, 1910–13. During this second venture, Scott led a party of five which reached the South Pole on 17 January 1912, only to find that they had been preceded by Roald Amundsen's Norwegian expedition. On their return journey, Scott and his four comrades all died from a combination of exhaustion, starvation and extreme cold.

935: First time the word 'penguin' is used to describe the southern bird. (1586-1588). Occurred on the third circumnavigation of the world by Thomas Cavendish in the Desire.

936: First to cross the Antarctic Circle. (January 17, 1773). Captain James Cook on his second voyage in the Resolution and Discovery. Crossed a total of three times during that voyage. In doing so, Cook was the first to circumnavigate Antarctica.

937: Possibly the first to die in Antarctica, the Spanish officers, soldiers and seamen on board the San Telmo which sank in September 1819. There is a cairn commemorating this at Half Moon Beach, Cape Shirreff, Livingston Island, South Shetland Islands.

938: First scientist to work in Antarctica. William H.B. Webster sailed aboard the Chanticleer to South Shetlands to make pendulum and magnetic observations. Entered Deception Island on January 9, 1829.

939: First dog known to have been in the Antarctic. (1839). 'Sydney,' a dog picked up in Australia by Lt. Charles Wilkes of the United States Exploring Expedition.

941: First Head of State to visit the Antarctic, Gabriel Gonzales Videla of Chile, in 1950.

942: First recorded birth of any species at the South Pole. (March 14, 1961). Pandora the hamster gave birth to twins at South Pole Station.

944: First recorded wedding at the South Pole. (February 11, 1985). Patricia Manglicmot and Randall Chambers were married at South Pole station. (Thanks to Bill-Ace Baker via John Splettstoesser.)

945: First women to reach the South Pole by land, Victoria E. Murden and Shirley Metz. (January 17, 1989).

947: First ever fancy dress ball in Antarctica. (December 31, 1841). New Years Eve during Sir James Clark Ross's expedition.

948: First fish caught below the Antarctic Circle. (February 1842). Landed on the Terror during Ross's expedition. The ship's cat found it and made a meal of it.
949: First expedition to the Antarctic whose aims were solely scientific. (1872-1876). Challenger expedition, under Captain Sir George Nares and Wyville Thomson, sponsored by the Royal Society.
950: First human earth burial in the Antarctic. (October 14, 1899). Nicolai Hansen buried above Cape Adare; grave was "dug" with dynamite. Southern Cross expedition under Carsten Borchgrevink.
951: First sledge journey on Ross Ice Shelf. (February 16, 1900). Party sledged 10 miles to new 'Furthest South'. Southern Cross expedition under Carsten Borchgrevink.
952: First balloon ascent in Antarctica. (February 4, 1902). Eva was name of balloon. British National Antarctic (Discovery) expedition under Robert F. Scott.
955: First surgical operation performed in Antarctica. (October 18, 1903). Dr. Koettlitz removes cyst from Lt. Royds' cheek. British National Antarctic expedition under Robert F. Scott in Discovery.
956: First permanent scientific station to be established in the Antarctic, at Laurie Island, south Orkneys. Scottish National Antarctic expedition under William Speirs Bruce in the Scotia.
957: First automobile in Antarctica lowered onto ice. (February 1, 1908). British Antarctic expedition under Ernest H. Shackleton in the Nimrod.
958: First evidence of coal found in Antarctica, discovered by Frank Wild. (December 17, 1908). British Antarctic expedition under Ernest H. Shackleton in the Nimrod.
962: First woman to set foot on the Antarctic mainland, Caroline Mikkelsen. (February 20, 1935).
964: Lakshmibai's horses included Sarangi, Pavan and Badal; according to tradition she rode Badal when escaping from the fort in 1858.
965: Alexander the Great and King Puru
According to one legendary narrative, when Alexander the Great invaded India in 326 BCE, Roxana (or Roshanak, his wife) sent a sacred thread to Porus, asking him not to harm her husband in battle. In accordance with tradition, Porus, a Katoch king, gave full respect to the rakhi. On the battlefield, when Porus was about to deliver a final blow to Alexander, he saw the rakhi on his own wrist and restrained himself from attacking.
966: When Ganesha's sister Manasa celebrates the festival with him, his sons ask Ganesha to grant them a sister. Although Ganesha initially refuses, upon the repeated pleas of his two wives Riddhi and Siddhi, sons, sister and the divine sage Narada, Ganesha creates Santoshi Mata through two flames rising from his wives' breasts. Narada decreed that this mind-born daughter of Ganesha will always fulfil everyone's desires and thus, would be called Santoshi Maa, the Mother of Satisfaction.
967: Angel fall:- Jimmy Angel's aircraft, El Rio Caroní, exhibited in front of Ciudad Bolívar airport. Angel Falls (Spanish: Salto Ángel; Pemon language: Kerepakupai Venâ, meaning "waterfall of the deepest place", or Parakupâ Vená, meaning "the fall from the highest point") is a waterfall in Venezuela. It is the world's highest uninterrupted waterfall, with a height of 979 m (3,212 ft) and a plunge of 807 m (2,648 ft). The waterfall drops over the edge of the Auyantepui mountain in the Canaima National Park (Spanish: Parque Nacional Canaima), a UNESCO World Heritage site in the Gran Sabana region of Bolívar State. The height figure 979 m (3,212 ft) mostly consists of the
main plunge but also includes about 400 m (0.25 mi) of sloped cascades and rapids below the drop and a 30-metre (98 ft) high plunge downstream of the talus rapids.

The falls are on the Gauja River (alternatively known as the Kerep River or Kerepacupai), which flows into the Churun River, a tributary of the Carrao River.

968:B]ritish India consisted of 17 provinces and 562 princely states.
The High Court at Calcutta, formerly known as the High Court of Judicature at Fort William, was brought into existence by the Letters Patent dated 14th May, 1862, issued under the High Court's Act, 1861, which provided that the jurisdiction and powers of the High Court were to be defined by Letters Patent. The High Court of Judicature at Fort William was formally opened on 1st July, 1862, with Sir Barnes Peacock as its first Chief Justice. Appointed on 2nd February, 1863, Justice Sumboo Nath Pandit was the first Indian to assume office as a Judge of the Calcutta High Court, followed by legal luminaries such as Justice Dwarka Nath Mitter, Justice Ramesh Chandra Mitter, Sir Chunder Madhab Ghosh, Sir Gooroodas Banerji, Sir Ashutosh Mookerjee and Justice P.B. Chakravartti who was the first Indian to become a permanent Chief Justice of the Calcutta High Court.

969:Shrimps' hearts are in their heads.
970: The silkworm moth has eleven brains.
971:According to tradition the bayonet was developed in Bayonne, France, in the 17th century.
972:Achilles was the son of the mortal Peleus and the Nereid Thetis. He was the mightiest of the Greeks who fought in the Trojan War, and was the hero of Homer's Iliad.
Thetis attempted unsuccessfully to make her son immortal. There are two versions of the story. In the earlier version, Thetis anointed the infant with ambrosia and then placed him upon a fire to burn away his mortal portions; she was interrupted by Peleus, whereupon she abandoned both father and son in a rage. Peleus placed the child in the care of the Centaur Chiron, who raised and educated the boy. In the later version, she held the young Achilles by the heel and dipped him in the river Styx; everything the sacred waters touched became invulnerable, but the heel remained dry and therefore unprotected.
972: Priam's son Paris (or Alexander), aided by Apollo, wounded Achilles in the heel with an arrow; Achilles died of the wound. After his death, it was decided to award Achilles' divinely-wrought armor to the bravest of the Greeks. Odysseus and Ajax competed for the prize, with each man making a speech explaining why he deserved the honor; Odysseus won, and Ajax then went mad and committed suicide.
973: June 9, the birthday (National Daughter's day) of late Smt. Nandini Satpathy, has been installed as National Daughters' Day- Nandini Diwas. Nandini and Diwas are two Sanskrit words which mean daughter and day, respectively.
974: According to Śvētāmbara traditions, the embryo of Mahavira was transferred from a Brahmin woman, Devananda, to a Kshatriya woman, Trisala. This is described in the Acaranga and Kalpa Sūtras. In the Vyākhyāprajñapti, Mahavira acknowledges Devananda as his real mother.
975: The Anoma is a river in southern Nepal, near Kapilavastu, where Prince Siddhartha renounced the world before becoming Gautama Buddha by cutting off his hair, abandoning his royal dress and exchanging it for the robes of an ascetic.
976: Horses also represented the sun because the horse was the avatar of the sun God, Surya, who was a form of Vishnu. Surya is said to have been drawn in a chariot pulled by seven red mares called Harrits. The horses names were: Bronte (thunder), Eos (day break), Ethiops (flashing), Ethon (fiery), Erythreios (red producer), Philogen (earth loving), and Pyrois (fiery).
977: Vidura was the half-brother to the kings Dhritarashtra and Pandu of Hastinapura, born the son of the sage Vyasa and Sûdri, a lady-in-waiting to the queens Ambika and Ambalika of the city. By some accounts, he was an incarnation of the god of death and justice Yama Dharma Raja, who had been cursed by the sage Mandavoya.
978: Yuyutsu (Sanskrit: युयुत्सू) in the Hindu epic Mahabharata was a son of Dhritrashtra with a Vaishya woman named Sukhada. The Mahabharatha cites the following other names for Yuyutsu: Dhartarstra, Dhrtarastra, Dhrtarastraputra, Karana, Kauravya, and Vaisyaputra.

979: Dhuljanah (Arabic: ذو جنح) was the horse of Husayn ibn Ali. The original name of Dhuljanah was Murtajiz and Maymoon and the reason for it being named that way was because of its sound of neighing being sweet, furious and high making it different from other horses. It was purchased by the Prophet Muhammad from an Arab called Haris. It features prominently in the traditional narrating of the story of the Battle of Karbala and it is thought to have been a white stallion.

980: Adolph Hitler’s horse, Nordlicht, is buried in USA.

981: Neptune is the coldest planet in the Solar System
At the top of its clouds, temperatures on Neptune can dip down to 51.7 Kelvin, or -221.4 degrees Celsius. That’s cold! Pluto gets colder, but then, Pluto isn’t a planet any more.

982: Neptune’s moon Triton is even colder
There are many cold places in the Solar System, but one of the coldest is the surface of Neptune’s moon Triton. This is the largest of Neptune’s 13 moons, and the only one with enough mass and gravity to pull itself into a sphere. In fact, it’s the 7th largest moon in the Solar System.

Temperatures on the surface of Triton can dip down to only 38 Kelvin or –235 degrees Celsius. But even though it’s incredibly cold, the surface of Triton is very active.

983: A day on Venus lasts longer than a year:
It takes 243 Earth days to make rotate once on its axis. The planet’s orbit around the Sun takes 225 Earth days, compared to the Earth’s 365.

984: Venus is the second brightest object in the night sky:
Only the Moon is brighter. With a magnitude of between -3.8 to -4.6 Venus is so bright it can be seen during daytime on a clear day.

Venus is also known as the Morning Star and the Evening Star:
Early civilisations thought Venus was two different bodies, called Phosphorus and Hesperus by the Greeks, and Lucifer and Vesper by the Romans. This is because when its orbit around the Sun overtakes Earth’s orbit, it changes from being visible after sunset to being visible before sunrise.

Mayan astronomers made detailed observations of Venus as early as 650 AD.

Venus is the hottest planet in our solar system:
The average surface temperature is 462 °C, and because Venus does not tilt on its axis, there is no seasonal variation. The dense atmosphere of around 96.5 percent carbon dioxide traps heat and causes a greenhouse effect.

985: Mars is home to the tallest mountain in the solar system.
Olympus Mons, a shield volcano, is 21km high and 600km in diameter. Despite having formed over billions of years, evidence from volcanic lava flows is so recent many scientists believe it could still be active.

986: First on Mars:
USSR’s Marsnik 1, was launched in 1960. Europe’s Exobiology on Mars program (scheduled launch 2016) plans to: search for possible traces of Martian life; study the surface environment; map potential hazards to manned missions in the future and begin preparations for an eventual return flight.

987: Mars has the largest dust storms in the solar system:
They can last for months and cover the entire planet on.

988: Mercury is the second densest planet:
Even though the planet is small, Mercury is very dense. Each cubic centimetre has a density of 5.4 grams, with only the Earth having a higher density. This is largely due to Mercury being composed mainly of heavy metals and rock.

They were known as the sad-garbhas, or six garbhas, and they were all equally powerful and expert in military affairs. These sad-garbhas gave up the association of Hiranyakasipu, their grandfather, and underwent great austerities to satisfy Lord Brahma, who, upon being satisfied, agreed to give them whatever benediction they might desire. When asked by Lord Brahma to state what they wanted, the sad-garbhas replied, "Dear Lord Brahma, if you want to give us a benediction, give us the blessing that we will not be killed by any demigod, maha-roga, Yaksa, Gandharva-pati, Siddha, Carana or human being, nor by great sages who are perfect in their penances and austerities." Brahma understood their purpose and fulfilled their desire. But when Hiranyakasipu came to know of these events, he was very angry at his grandsons. "You have given up my association and have gone to worship Lord Brahma," he said, "and therefore I no longer have any affection for you. You have tried to save yourselves from the hands of the demigods, but I curse you in this way: Your father will take birth as Kamsa and kill all of you because you will take birth as sons of Devaki." Because of this curse, the grandsons of Hiranyakasipu had to take birth from the womb of Devaki and be killed by Kamsa, although he was previously their father.

1035: **Last man On the moon:** Regarding "the last man to walk on the Moon", Schmitt is the last person to step onto the Moon (as Cernan got out of the Apollo Lunar Module first), but Cernan is the last person to step off of the Moon (after final EVA (extra-vehicular activity), Schmitt went inside the module first). **Duke was the youngest, at age 36**; **Shepard was the oldest(47).**
